DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: Line 4, after "housing" a comma should be added; line 8, "a central knob" should be "a central hollow knob"; "said flexible ... lifter apparatus" in lines 10-11, "to comprise...apparatus" in lines 16-17 should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hasson (4,944,741). Hasson disclose a laparoscopic device as claimed comprising a flexible arms (16,18) having arcuate shapes (fig. 2) and blunt ends, first and second handles (58, 56), solid rod (72), an interally threaded ring housing (56), a locking screw (70), a tubular rod (22), a central knob (64). In regard to claim 4, Hasson discloses the laparoscopic device being used to perform a laparoscopic procedure (col. 3, lines 1-44), such procedure would inherently carry out all the steps as claimed.

Art Unit: 3731

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hasson (4,174,715) disclose a laparoscopy forceps and method of using.
